Our Company

The head office is located in **The Netherlands** and we have branches in **Germany, Lithuania, Poland and Singapore.**

Work Wise B.V.

Contracting and Recruitment Service

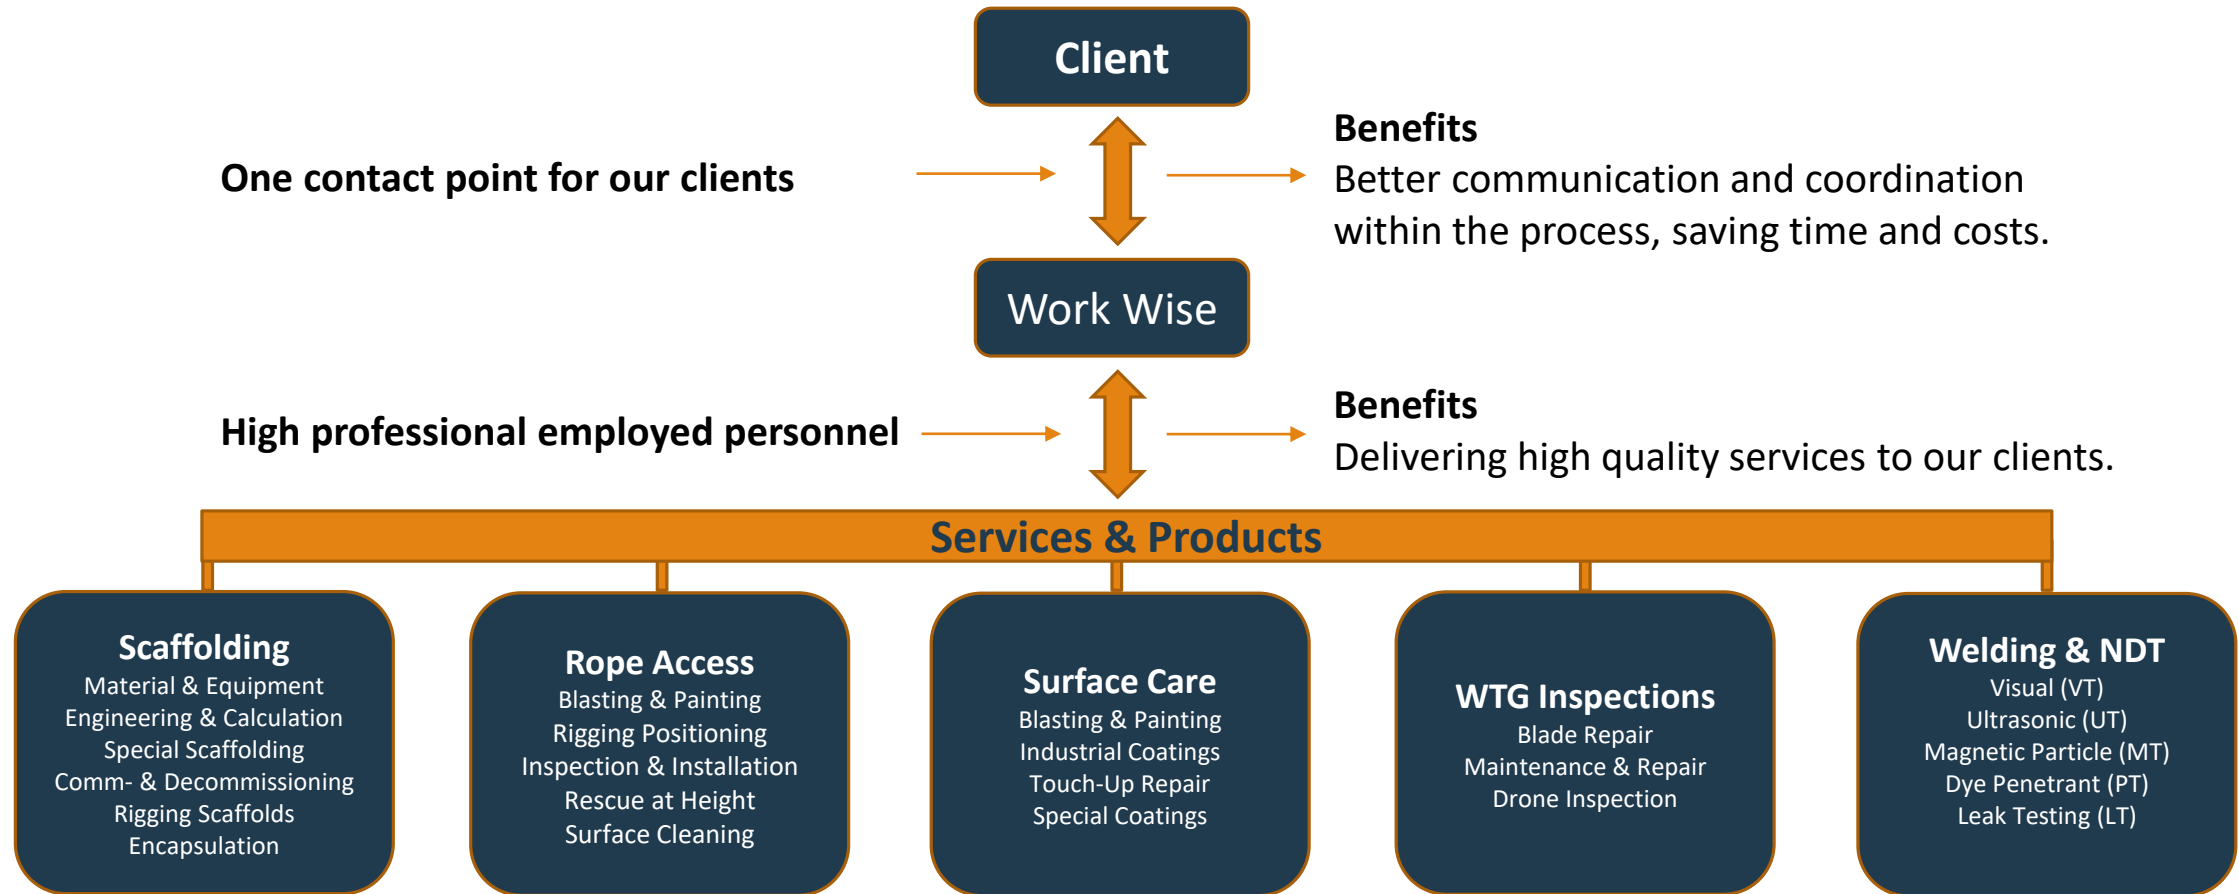

Work Wise Projecten B.V.

Performance contracting Maintenance Service

Maintenance Services

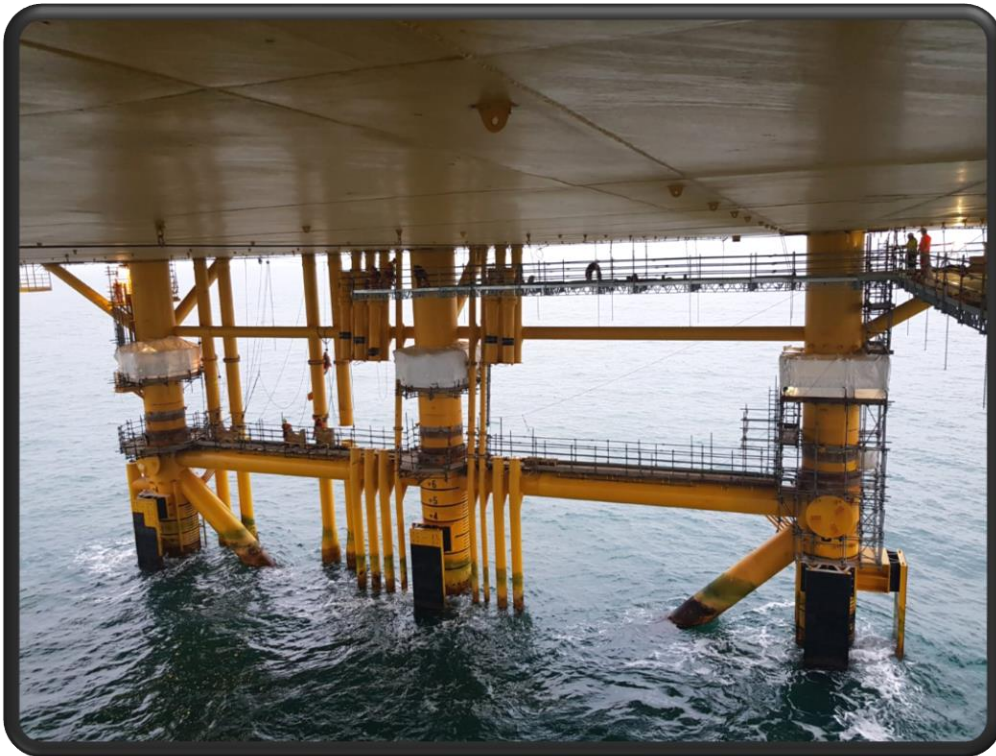

- Petrochemical Industries
- Oil & gas Industries
- Energy Industries
- Shipyard and Vessels
- Wind farms & Converter Stations
- Military

Services & Products

Scaffolding

According to NASC – BS/EN – VSB – UEG – Steiger Richtlijnen

Active since 1998 in the on & offshore petrochemical sector, on Heavy lifting Vessels, Converter Stations and production platforms.

Extensive files of certified personnel. GWO – DNV – Oil & Gas.

We know how to work and give the right total scaffolding service.

Following safety guidelines are required by law and the customer.

We supply first class and tailor-made work & service.

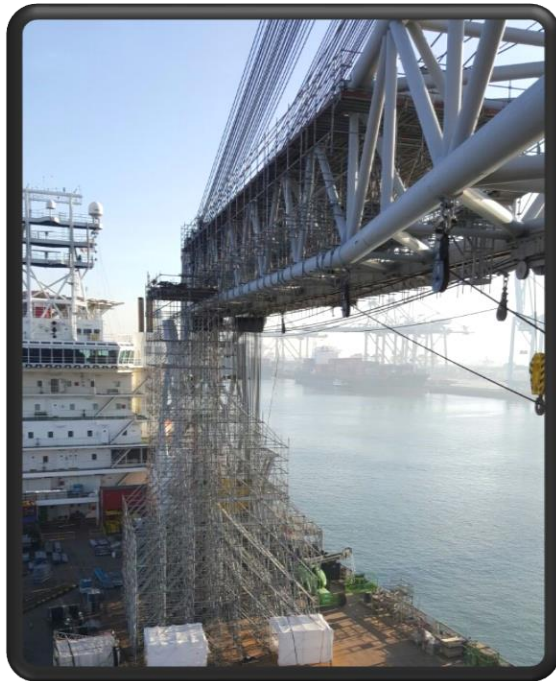

Qualified at all quality and safety requirements.

External engineering department for complex scaffolding.

Own stock of materials and supplier for scaffolding materials.

Scaffolding

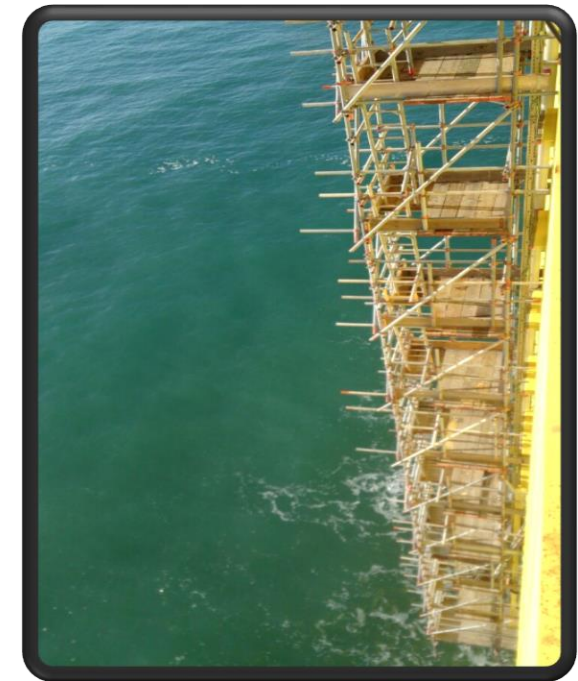

According to NASC – BS/EN – VSB – UEG – Steiger Richtlijnen

Maintenance Heavy Lift Crane

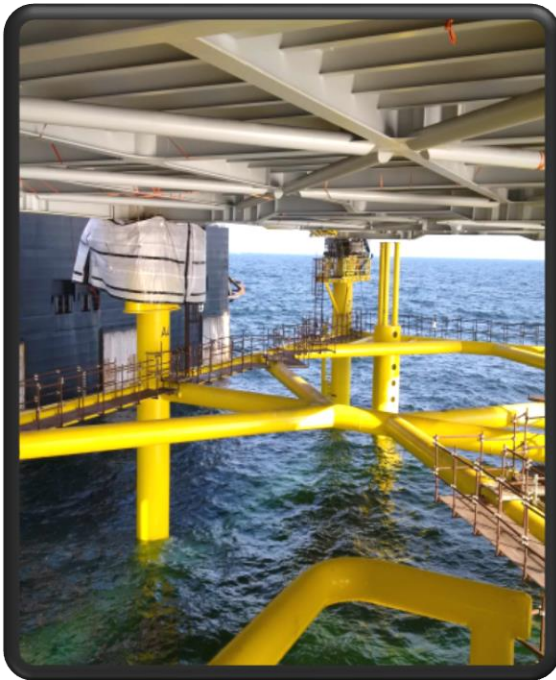

Jackets

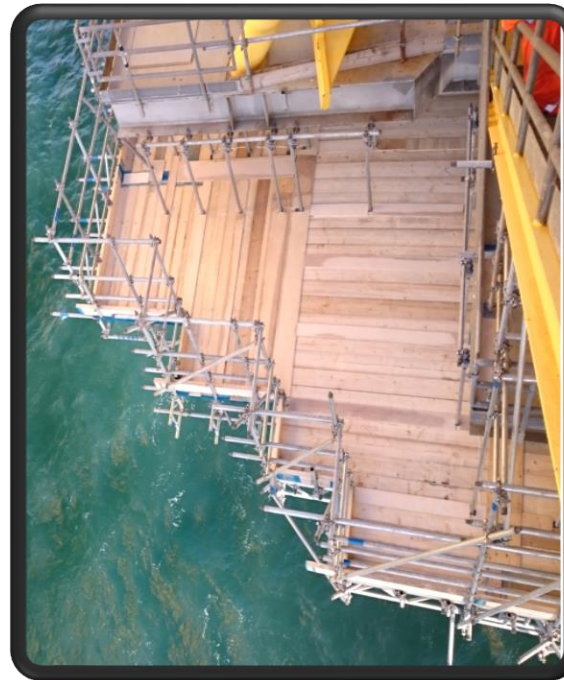

24m Hanging Scaffold

Scaffolding

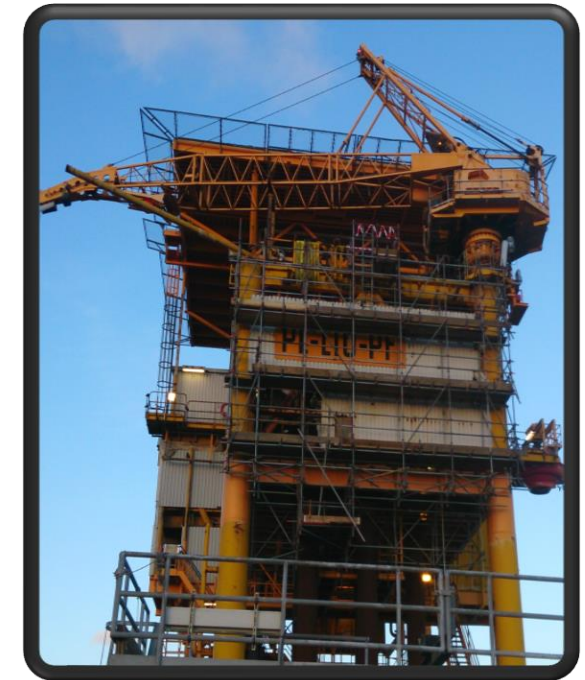

According to NASC – BS/EN – VSB – UEG – Steiger Richtlijnen

Spiderdeck Walkways

Heavy Load Scaffold 500kg/m²

Maintenance Platform

Scaffolding

According to NASC – BS/EN – VSB – UEG – Steiger Richtlijnen

Liftable Roof Construction

Tent Construction

Rope Access — IRATA/FISAT

Rope Access technique makes it able to **perform work at heights** and in **confined spaces**. We offer rope access for maintenance of **painting, leak repair, placing cables, UV-Protections, helideck drains** and much more.

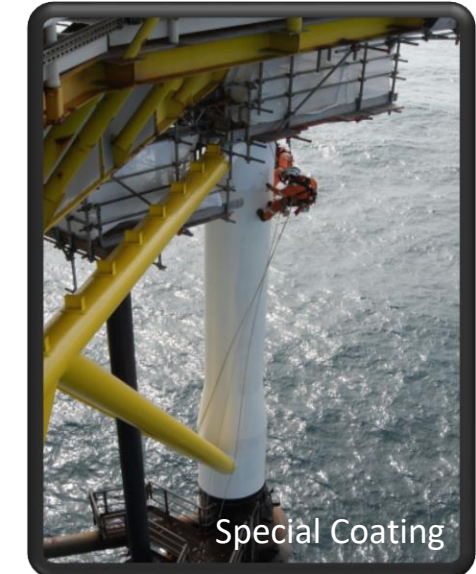

Mechanical Works

Mechanical Works

Wall Panel

Special Coating

Wall Cleaning	Inspection	Mechanical
NDT	WebNet/ DropSafe	Blasting & Painting
Technicians	Repair/ Replacement	Monopiles & Blade Repair
Insulation	Surface Care	WTG Inspection & Maintenance

With rope access support, we can perform **visual** and **photo inspection** of platforms and wind turbines. The advantage of this technique has proven itself unlimited times. It's rewarding in ways of **great safety records, efficiency** and **reducing time and costs**.

Surface Care

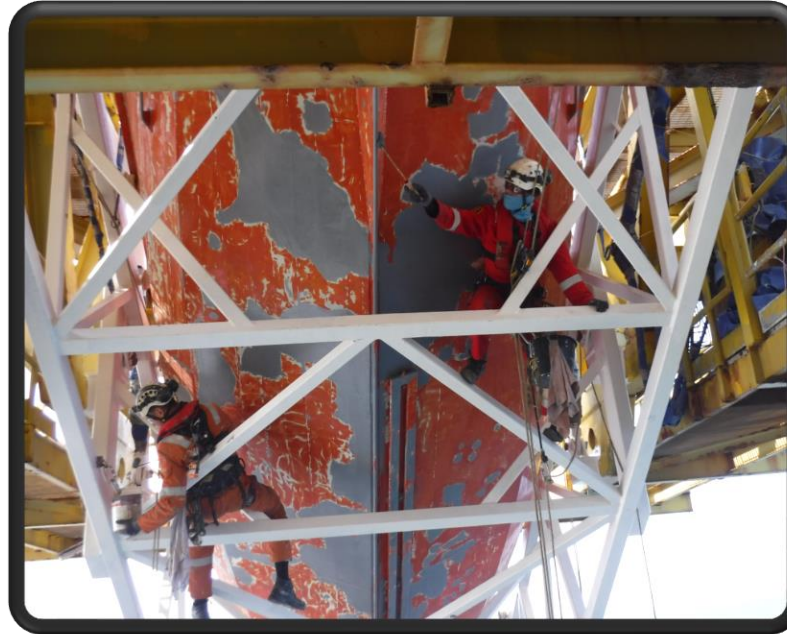

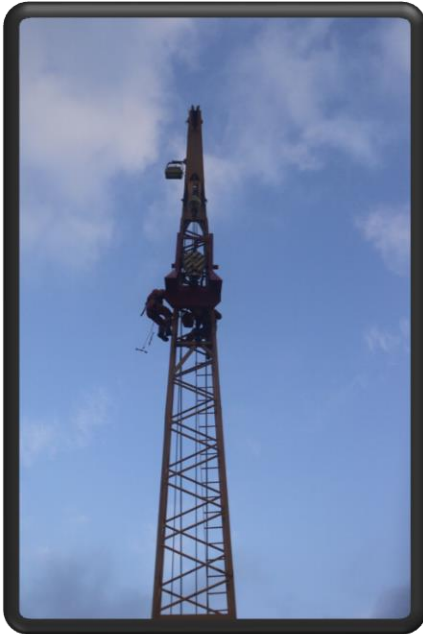

Nothing is maintenance free, mainly the painting/coating on the structure. This is being effected by the weather conditions and also by human labour on the work locations.

- + Paint Inspection – Quality Control – Method Statement**
- + Blasting and all other surface preparation**
- + Painting and coating supply according to requirements and standards**
- + Total project solution to any blast and painting job**

Up to date with new inventions and cost efficient solutions!

Surface Care

Surface Treatment for Construction

The corrosion protection of bridges and buildings, is not just about accounting for particular thermal stress. A high degree of logistical know-how is also required, which is no problem for us.

Unlike high-sea navigation, the main challenge in the development of construction corrosion protection, is not the encumbrance by salt water but that

they require particular logistic flexibility, as a result of their complexity and size, e.g. stadiums, industrial hangars or bridges, and thus an immediate local input. Thermal pollution such as fire protection coating or mechanical encumbrances, are often additional challenges beside extended claims under guarantee, which are taken into consideration, during project planning and implementation.

Special Coating – Surface Solutions

Pro Therm ET-X CI EN extreme heat shield coating

Small stuff doing great things

Stay on the safe side...

- Self-cleaning surfaces
- Air-purifying surfaces
- Removes germs
- Removes mold, algae
- Removes odour
- Removes stains

activated by visible light

- Most efficient product on the market
- High CO² reduction for the industry
- UV Protection & Anti Reflex Protection
- Dirt & Mud Protection – Self Cleaning

activated by visible light

Special Coating – Surface Solutions

Small stuff doing great things

Stay on the safe side...

- Impermeable
- Chemical resistant
- Anti-corrosive
- Dirt repelling
- Colour restoring

...always look pristine

A photograph of a blue industrial motor with a cooling fan, sitting on a light-colored concrete surface. The motor is the central focus of the image.

Small stuff doing great things

Stay on the safe side...

- Corrosion removal
- Corrosion prevention
- Corrosion passivation

...even without blasting!

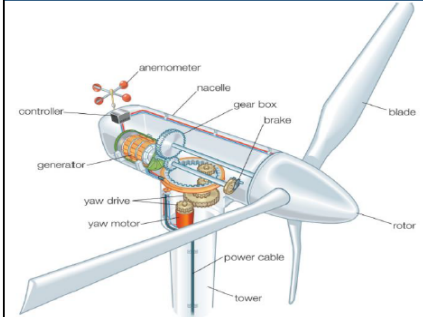

A close-up photograph of a heavily rusted metal surface. Three circular openings are visible, showing the dark interior of the holes. The rust is a deep orange-brown color.

...always look pristine

New Products – with long duration and best quality – reducing CO² and makes Green Maintenance possible

WTG Inspection Service

Welding & Cutting – Services

Prefabrication of structures and pipelines

Welding at heights We have appropriate qualifications and skills, which is confirmed by DNV, TÜV, LLOYD certificates of our welders. Many years of experience combined with comprehensive knowledge and precision of operation always results in a perfectly executed task.

We have our own workshop with a large area and modern machine resource, adapted to perform prefabrication of steel structures and pipelines. We deal with the prefabrication of both industrial pipeline systems as well as pipeline installations that operate under water. We manufacture elements and equipment of steel structures, and all elements manufactured by us are protected with an anti-corrosion coating, using various techniques.

NDT – Services

Visual (VT) - Ultrasonic (UT) - Magnetic Particle (MT) - Dye Penetrant (PT) – Eddy Current (ET)

Quality also means **durability**, high-quality products do not need to be replaced or repaired. This reduces costs for the customer and lowers the impact on the environment.

A good reputation is essential for all aspects of our service provision, spearheads of that reputation concern - Quality, Flexibility and Transparency.

- **MT** Magnetic Research
- **UT** Ultrasonic Examination
- **PT** Penetrant Investigation
- **VT** Visual Examination
- **ET** Eddy Current Research

Other methods we can offer include ultrasonic thickness measurements (UTT) and assessment of technical condition of the structure.

Quality & Safety

Work Wise invests time in understanding our customers' requirements in order to provide the best possible solutions for their existing and future needs.

We give the highest priority to safety and we have adopted a set of safety principles underlying all activities performed by Work Wise employees and contractors

As an *ISO 9001:2015, ISO 14001, ISO45001, Achilles JQS* registered company, Work Wise uses a quality management system that covers the total activities and processes required to meet our customers' expectations for world-class products and service.

Nothing is more important than the health and safety of our employees and customers. Work Wise works diligently through an active risk identification and management process to create a work environment free of incidents and injury. This company-wide behaviour is reinforced constantly through management commitment, safety meetings, communications, training and monitoring.

References of Services

Scaffolding – Rope Access – Blast & Paint – WTG Inspection & Maintenance – NDT

A vertical brochure for Work Wise Projecten. The top section has a dark red header with the text 'Onshore & Offshore Services Work Wise Projecten' and the company logo. Below this are several images of industrial sites with scaffolding and workers. Text boxes provide details about the company's services, including a list of services like Scaffolding, Rope Access, and Maintenance. The bottom of the brochure features the website address 'www.workwise.eu' and the text 'MANPOWER SUPPLY'.

Our best references we can provide are our long term contracts!

Work Wise Projecten is providing mentioned services for many years to our clients.

We are supporting several clients for more than **20 years**. That means that we provide our services with complete satisfaction to our clients.

Cost and time efficient project planning and realizing projects with smart solutions is our strength.

References on mentioned services are available on request.

Work Wise Projecten

Knowledge & Experience & Quality & Quantity & Liability

Fast & friendly

- ✚ Work Wise Projecten is available 24/7
- ✚ We supply qualified manpower on short term

Efficient

- ✚ Our own carefully chosen network
- ✚ Staff & offices in Europe & Asia

Safety first! Safe & sound , loud & clear

- ✚ No deviation from safety procedures
- ✚ No exceptions to the rules
